

THE GLEICHEN CALL

VOLUME XXX NO. 25

GLEICHEN, ALBERTA, WEDNESDAY SEPTEMBER 8, 1937

SUBSCRIPTION \$2.00 PER YEAR

HARVESTING IS DELAYED IN SOME DISTRICTS

(From the Alberta Department of Agriculture.)

Harvest is well advanced in southern and east-central districts, with wheat cutting practically completed, the bulk of coarse grains harvested, and threshing general. In west-central districts south of Edmonton, and running north-easterly to the St. Paul and Lloydminster areas; most of the wheat is cut, the coarse grain harvest is under way and threshing has commenced. In the Edmonton zone, north of Athabasca, harvesting of grain has been delayed by the cool weather and frequent showers of the past few weeks. Though wheat is mostly cut, harvest in general is delayed awaiting maturity of crop, and practically no threshing has been done. Weather has also prevailed in the Peace River district, and in consequence harvest had proceeded slowly. About two-thirds of cutting is done, but practically no threshing.

Yields over the province will vary widely. In parts of the dry area in the south-east no crop has been harvested, whereas at some points farmers are getting their seed back and in a few restricted districts wheat is yielding from 2 to 7 bushels. In the south-west wheat returns are from 1 to 25 bushels. Grades throughout the south are good. Not sufficient threshing has been done in central and northern districts, including the Peace River district, for autumn exports to yields are made. Yields are likely to vary by districts from 10 to 25 bushels of wheat, oats 25 to 4 bushels, barley 20 to 40 bushels, a good deal of second growth has occurred in north from Red Deer north to Athabasca, causing considerable variation in maturity, and grades may suffer accordingly. Heavy growth of weeds is also a problem and may interfere with proper curing in time. Ten days of clear dry weather would facilitate harvest in the northern half of the province, wherein continued cold and rain may mean reduction in grades and some loss in late crops, especially in the case of coarse grains.

Early August frosts did slight damage to grain in the Gleichen area. More serious frost injury is reported on the low lands of the Gran Prairie district where yield and grade are appreciably affected.

Hail storms occurred through August at a number of central and northern points, heaviest damage being sustained in an eight mile strip from Dundurn east to Hanna, part of the crop being completely destroyed. Some saw-fly damage is reported from the district south west of Drumheller.

The feed situation has greatly improved with rains of the past six weeks. This applies particularly to the northern half of the province where pastures are in good condition and seem ample of hay and green feed will be available for shipment. Second growth alfalfa is a good crop. There should be ample feed for the needs of the province.

Livestock on the whole is in excellent condition. The earlier short age of hog feed is relieved, and in some districts there is now a distinct tendency toward expansion in hogs.

THE WORLD OF WHEAT

By H. G. L. Strange, Director of "Crop Testing Plan."

A drastic decline has taken place in the world's demands for export wheat!

Mr. Broomhall estimates that the importing countries will buy this year only 496 million bushels.

This is in striking contrast to the \$18 millions which was the annual average amount purchased for five years prior to 1931, and to the 949 million bushels, the sales for 1928 alone.

We are told that millions of people need more bread. Why, then, is more export wheat purchased?

It is mainly because of an extraordinary economic delusion that has recently gripped the minds of most governments; that their people can become richer and richer by bringing in less and less of the goods and

Indians Hope To Celebrate Signing Treaty No. Seven

September 22nd is the 60th anniversary of the signing of Treaty No. 7 at the Blackfoot Crossing, south of Cluny, and the Indians are very anxious to celebrate the occasion.

If present plans are carried out there will be an program on the flats near the South Camp buildings on the afternoon of Wednesday the 22nd.

Indians from various reserves in Southern and Central Alberta would attend, while invited guests would include prominent men and women in the public service, Churchmen, Mounted Police, and old timers of the province.

If this celebration is going to be carried out The Call will have full details next issue, therefore watch for further information.

DEMAND LOWER GASOLINE COSTS

Movement is developing in this province to bring about lower gasoline prices. Recently the oil companies announced a reduction of one cent per gallon in gasoline prices. For sometime there have been suggestions that strong demands should be made for lower gasoline taxes.

Low cost of gasoline has been an major factor in expanding automobile ownership among families in the United States of modest incomes.

A recent survey showed that most automobiles are owned by Americans earning \$25 a week than are owned by motorists in all income classes in the balance of the world.

In the United States prices of gasoline have declined and now stand a only about half of the post-war price. Taxes, however, have advanced enormously and motorists pay a average of 40 per cent of the retail price of gasoline in state and federal taxes.

It is also a fact that lower gasoline prices form a stronger inducement to developing the tourist trade.

THEORY AND PRACTICE

There is hardly a grain producer in this province that knows that theoretically, the co-operative system is the soundest and best. While many thousands support their belief in practical way by patronizing co-operative institutions such as Alberta Pool Elevators, others fail to do so. If the theory is sound enough it should be supported.

services of other countries; Governments forge, apparently, that the imports from other countries constitute, in the end, the only means of payment for their own export products.

Dr. John Mackay, eminent English philosopher, in considering these curious illusions and madnesses, wrote: "Men think in herds they go mad in herds, and recover their sanity slowly, and one by one."

Dr. McRae notes, however, that economic sanity does eventually return. Let us hope, for the sake of the wheat producer, and of all of us, that it may be soon.

Following factors have tended to lower price: Hostilities between China and Japan, and the resulting price reductions. Floating wheat stocks decrease. Complaints from Russia of slow harvesting operations and much damage to uncut wheat. World visible stocks less than last year. Indian monsoon a failure. European fruit prospects poor.

Following factors have tended to lower price: World demand for export wheat continues small. Romanian wheat estimate increased. Substantial Turkish wheat surplus. Yields increase in many parts of Europe. Rains check deterioration in Southern Hemisphere. Expect considerable increase in Swiss potato crop. Sweden removes ban on export of food grains.

LARGE ATTENDANCE AT THE LAST JUNIOR U.F.A. MEET

The Junior U. F. A. held their regular meeting at the home of Miss Harry Burke, with twenty-two members and five visitors present.

The meeting opened with the singing of the National and American Anthems. The roll call was answered by Harry Spots and Parks' I'd Like to Visit. The Local was divided into four groups, each group taking the responsibility of the entertainment or a meeting.

A new lunch committee of Bill Ferguson, Leonard Scott and Jessie Burns was elected. Jessie Burke won the raffle and Wilbur Murray and Edward Quinell won the prizes in a shooting match.

The evening closed with "For She's a Jolly Good Fellow" and a vote o banks to Mrs. Burke. The next meeting will be held at Mrs. R. Umbricht's on September 10th.

CHARTERED BANKS TO CONDUCT SERIES BROADCASTS

Canada's Chartered Banks through their Public Relations Adviser, Vernon Knowles, are conducting a series of non-political, non-controversial radio broadcasts on the Functions and Operations of Canadian Banks it was learned from Edmonton.

The addresses are being broadcast over an all-Alberta network Tuesday nights from 10:15 to 10:30 and Wednesdays in the daytime from 1:15 to 3:00.

Mr. Knowles, who homesteaded in Alberta in 1899, is a former, well known newspaper man, who has worked on several western daily newspapers. He was editor and manager of the Winnipeg Telegram and later managing editor of the Winnipeg Tribune. He has also served in the parliamentary press galleries at Ottawa and in press galleries of Manitoba, Saskatchewan and Ontario. He was editor and member of the board of directors of the Toronto Mail and Empire from 1928 to 1932 and from 1933 to the end of last year was managing editor of the Toronto Daily Star. In January 1937 he assumed his present position.

In commenting on the series of broadcasts Mr. Knowles laid particular stress upon the fact that they were designed to be completely non-political.

GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, Minister. Mrs. H. Birch, choir leader. Miss Jean Ferguson, pianist. 11 a.m. Church School. 7:30 p.m. Devine Worship. Subject: "The Sixth Commandment as Interpreted by Jesus."

According to this interpretation many people who would be horrified at the thought of killing anyone are guilty of just as serious an offence as that and will be judged accordingly.

MEDICINE HAT BALL PLAYERS DEFEAT BOW VALLEY

By Defeating the Bow Valley Juniors 5-0 in the fifth and deciding game, the Medicine Hat Crescents advanced to the semi-finals of the Alberta junior baseball playoffs, and will meet Naomina in the next round. Zaiser deserves much credit for pitching Medicine Hat to two victories in two days.

Results of the other games: Game Bow Valley 12, Medicine Hat 9. 2nd game Med. Hat 6, Bow Valley 5. 3rd game at Arrowwood, Med. Hat 7, Bow Valley 5. 4th game, Bow Valley 9, Med Hat 8. Final game Bow Valley 0.

Medicine Hat lineup: Bannon, Zaiser, Brotherton, Harrison, Toole, Crane, Holdersay, Parker, Newmann, Brodersky.

The Bow Valley lineup was as follows: B. Cole; W. Lester; E. Lester; W. MacCallum; H. Williams; P. Brown; I. Scott; McCloudian; Dunn, L. Irwin; L. Clemmons; B. Williams, Floyd and Cary.

CENT-A-MILE TO EASTERN CANADA OFFERED BY C.P.R.

The opportunity to visit Eastern Canada on the cent-a-mile tickets will be available over the Canadian Pacific from September 18th to October 2nd, allowing 45 days to return to starting point.

The cent-a-mile applies to coach tickets only; for those who desire to use the tourist sleeper the rate will be one cent and a quarter, and should first class sleeper be required the rate will be on the basis of a cent and one-half per mile.

Stopovers are allowed at Winnipeg and stations east either way, within the forty-five day limit.

These fares provide an opportunity for an economical fall trip, and will probably not occur again this year at such low rates.

Mr. H. L. Phillips, ticket agent at Gleichen will gladly give further particulars and arrange all details.

LADIES SOCIAL CREDIT GROUP MEET

The Meadowbrook Ladies Social Credit Group met in regular semi-monthly meeting on Thursday, September 2nd the hostess on this occasion being Mrs. R. Hayes, the president.

Eighteen members answered the roll call, with a Harvest Hint. The minutes of the last meeting were read and the general business was carried through.

The president reported that a very enjoyable afternoon was spent with the Arrowood Ladies Socia Credit Group on August 25th. A contest sponsored by Miss Ralphine Hayes proved to be a lot of fun, the prize being awarded to Mrs. Claude Houche. On motion the meeting then adjourned. A very delicious tea was served by Miss Ralphine and Miss Verona Hayes.

Mr. Arthur Renaud will be hostess at the next meeting scheduled to be held on September 16th.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Mrs. D. B. McNeil spent a day visiting Mrs. A. E. Jones on her way from the east to her home in Vancouver.

Probably the largest price ever paid for hogs locally was when G. T. Jones sold to P. Burns 86 hogs for \$17.10, and total value was \$3,556.80, or \$40 a hog. The weight was 20,800 averaging 242 pounds.

Jim Creary of Carlsbad has been preparing for sometime to take an extensive trip to Gleichen. All his friends are congratulating him on his plans. On his return home he will give a lecture on preparedness.

Miss Gertie Tudsoppe of Calgary is visiting her parents here.

Mrs. Burke returned last week from Banff where she spent three weeks sight seeing.

F. L. Mallory has returned from a short visit to his home in Tocoma.

LISTEN IN!

A Sound Practice

It is a sound practice to deliver your grain regularly to your U.G.G. Elevator. Through many years' experience farmers have learned that they can count on this farmers' company for satisfactory service in handling their grain.

Deliver your grain to

UNITED GRAIN GROWERS

Elevators at: Gleichen, Arrowwood, Shoultice, Cluny, Namaka.

THERE IS A REASON

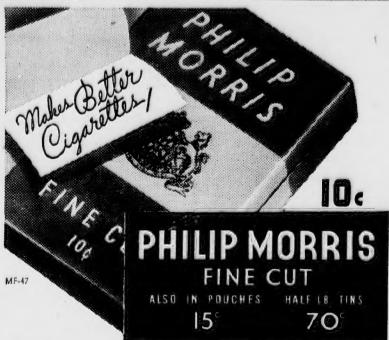

Each year many thousands of Alberta grain producers patronize Alberta Pool Elevators. Sensible, level-headed men, these farmers know that it is to their interest that Alberta Pool Elevators should be the predominant grain handling system in this province. If you are not already a Pool Elevator patron think over the proposal of being one this year.

Alberta Pool Elevators

Mr. and Mrs. J. A. Ramsay and Levitt motored to High River Sunday and state the recent hail storm played a great havoc in that district.

Miss Eva Garrett of Banff has been engaged by the school board to fill the vacancy caused by Miss Bowser who has resigned.

THE GLEICHEN CALL, GLEICHEN, ALBERTA

Confidence Restored

The recent announcement of Prime Minister Neville Chamberlain and Foreign Secretary Arthur Eden of Great Britain's intention to face her responsibilities by returning as speedily as possible and to such an extent that "nobody dare treat her with anything but respect" will fall on many receptive and welcoming ears, not only within Great Britain and the Empire but in other countries who look to Britain for leadership in the task of preserving the democratic form of government.

There is no question but that Britain has "lost face", to use an Oriental expression, during the past two or three years, because of her failure to take a stand in the councils of the League of Nations strong enough to prevent the rights of member nations being violated.

Representative newspaper and magazine writers in some of the smaller democratic countries of Europe, such as the Scandinavian group, who have been wont to look to Britain for leadership and who, at any rate in recent years, have been strong friends of Great Britain, have, in the past year or two voiced keen disappointment at the situation and more particularly have expressed criticism over the Ethiopian debacle.

But there was a very good reason why Britain could not go further than the token attempts to enforce sanctions against Italy as the violator of Abyssinia. Not only was better than the British representatives on the councils of the League that stronger measures were needed to prevent despoliation of the northern African kingdom she was not in a position to ensure that these methods were carried out.

The British war machine, and particularly the aerial arm of it, had been allowed to become obsolete and no efforts had been made to bring it up to date; or, conversely, it might be more correct to say that other and more belligerent nations had built up huge destructive forces and little or nothing had been done by Britain to keep pace with their activities.

Under these circumstances it would have been futile for Britain to have displayed a fist which was not heavily mailed or to have uttered threats which she could not carry out. She did not want to start something she knew that she could not finish. Hence, nothing more could be expediently done than advise and negotiate, in the knowledge that anything more forceful might precipitate a disaster which the great majority of nations hoped to avoid. It was a policy of prudence and that was the only policy that could help to adduce at the time.

Now, however, that all has changed. Great Britain has already commenced an active and ambitious program of rearmament which, in a year or two at the outside, will enable her to resume her role as leader of the European and world democracies in the full knowledge and certainty that the utterances and decisions of her representatives will be respected by even the most powerful and belligerent of nations.

The general objective of the program was aptly expressed by Prime Minister Chamberlain when he told his constituents that it was the aim to make Britain so strong "that nobody dare treat her with anything but respect" and his additional announcement that he faced his responsibilities "without fear or hesitation" will inspire confidence not only in Britain but in many other countries who are genuinely anxious to preserve world peace, as is Britain herself.

Confidence will be further fortified by the supplemental declaration of Sir Anthony Eden that immediate and specific objectives are preservation of the territorial integrity of Spain and the maintenance of the Mediterranean as a main arterial road for the flags of all nations.

Both these objectives have been threatened in recent weeks as the war in Spain continues. The dismemberment and even the potential dismemberment of Spain would undoubtedly precipitate a general conflagration in which all the European countries might ultimately become involved and that is what the majority of the non-belligerent nations of Europe fear so much to-day.

Despite the declarations of individual visitors from Europe to this continent to the effect that a general war will be avoided, it is generally recognized on both sides of the Atlantic that the trend of events in Spain, coupled with a great deal of outside interference, constitutes a grave danger to the peace of Europe and perhaps of the world.

A strong and well-armed Britain, with no ulterior motive to serve, will go a long way to allay such alarms and will do much to ensure peace in Europe and security for the democratic countries of that continent.

Something New To Try

According to the Christian Science Monitor, to Horace Creely, the famous editor, a woman once wrote: "Our church is in dire financial straits. We have tried every device to keep it going—fairs, strawberry festivals, oyster suppers, a donkey party, turkeys, bazaars, etc. We have had mock marriages, and box sodas. Will you please tell us, Mr. Greeley, what we can do to keep our struggling church from disbanding?"

Starts Annual Patrol

The N. B. McLean, the biggest unit of the government ice-breaking fleet, has sailed from her on annual 5,000-mile patrol in Hudson Bay and strait. The ship, under Capt. W. J. Balcom, formerly of Halifax, will be away until October.

Visitor: "Your son is rather small for his age, isn't he."

Proud Mother: "Oh, no; most boys of his age are overweight, I think."

Italy used safety pins 3,600 years ago.

BLACKHEADS

Don't squeeze blackheads—dissolve them. Get two ounces of peroxide powder from any drug store and dip a wet washcloth over the blackheads. They simply dissolve and disappear by a safe and sure method. Have a Hollywood complexion!

Trees For The Prairie
Since the program of work under the Prairie Rehabilitation Act was begun in 1935, a total of 960,440 trees have been supplied free for planting in the prairie provinces. District experimental stations took 77,730 in 1935 and 1936. Agricultural improvements in 1936 included 330,000. In addition, the regular distribution of trees from Indian Head and Sutherland nursery stations in 1935 and 1936 totalled 11,828,854. From 1901 to 1936, these two shelters have distributed free to farmers in the three prairie provinces over 150 million trees.

"I am grateful to you for the confidence you have reposed in me," stated the winning candidate.

"All right," said a voice in the rear, "but don't do any more repousing. Get busy."

It takes four to eight times as much soap to make a satisfactory cleansing lather when hard water is used than when soft water is available, depending on the degree of hardness of the water.

In comparison with human eyes, the eyes of most birds are telescope. A small grain particle hardly distinguished by a person standing a yard away from it, is seen 100 yards by some birds.

Multiplicity Of Duties

Royal Canadian Mounted Police in Northwest Territories Kept Busy
Wherever the scientist, explorer, prospector and surveyor goes in the Northwest Territories he finds the Royal Canadian Mounted Police to help him and he finds the Mounties represent just about a dozen kinds of officials.

A government statement dealing with the Northwest Territories discloses the information that "the prevention of lawlessness and apprehension of offenders are but a part of the multiplicity of duties performed by members of the force."

"They are entrusted also with enforcement of the Northwest Game Act, the Migratory Birds Convention Act and various other Dominion acts."

In certain circumstances they are called upon to assume customs and immigration duties, to collect income taxes, accept applications for mineralization, act as postmaster, issue timber permits or coronsers; to issue timber permits, register vital statistics, issue rations to destitute Eskimos and Indians and supervise liquor permits and importation of liquor.

All commissioned officers are justices of the peace and all ranks are commissioners for administering oaths. Sheriff of the Northwest Territories is Major-General Sir James H. MacBrien, commissioner of the R.C.M.P.

The force has men at 22 points. Along the Mackenzie basin they are stationed at Resolution, Providence, Santa Barbara, Great Slave Lake, Arctic Red River, Matlaid and Yellowknife. Scattered along the Arctic shores they are at Cambridge, Cambridge Bay, Cameron Bay, Fort Rae and on the patrol boat "St. Roch."

In the Slave River area is a station at Fort Smith, and on the McLeod Bay area at Chesterfield and on McLeod Bay at Reliance. Farther east are posts at Fort Burwell, Eskimo Point, Lake Harbor, Pangnirtung, Pond Inlet and Craig Harbor.

Forfeits Crown For Love

Prince Charles Of Sweden Marries Countess Elsa Von Rosen, A Commoner

Prince Charles of Sweden sacrificed any chance of inheriting the throne when he married Countess Elsa von Rosen, a commoner.

The nephew of King Gustaf V of Sweden and brother of the late Queen Astrid of the Belgians, lost his title and prerogatives in the Swedish royal family.

He acquired a common title, however, becoming by royal decree Prince Charles Bernadotte. His bride, daughter of the Swedish court master of ceremonies, became Princess Elsa.

Prince Charles was the third member of the Swedish royal family in recent years to forfeit his crown rights for love.

The new princess, seven years older than her 26-year-old husband, was divorced in 1935 from M. Agilon von Rosen. She has three children.

Lonely Island Was Safer

Civilization Proved Too Much For Boy From Tristan da Cunha

Civilization proved too much for the youth who left the lonely island of the world. After less than a year in London he died.

Donald Glass was a direct descendant of William Glass, who founded the settlement at Tristan da Cunha, south Atlantic, more than a century ago.

Donald left a happy isle, where disease is virtually unknown, determined to succeed in the great world. He was accepted by the Boy Scouts, who tried to make life for him something like that in the home from where he came, but they failed to consider the germs that afflict civilization. He fell ill and gradually declined.

A motorist driving 45 miles an hour steadily for 10 hours a day would require 15 years, 10 months, and 21 days to travel over all the improved roads of the United States.

From here it is beginning to appear that trying to get rid of relief is much like trying to throw away a wad of chewing gum, says Judge.

Hamburg, Germany, has a population of more than 1,128,000.

Job Was Thorough

Crude Operation By Amateur Surgeon Probably Saved Man's Life

A crude operation performed with a fishline and a net-mending needle appeared to have saved the life of a man badly torn by a rusty spike on lonely St. Paul Island.

Within twelve days he spent tossing with pain while passing boats overlooked his distress signal. Robert L. Brooks, the injured man, was expected to survive.

Brooks, lessee of the wind-swept speck in the Channel Islands chain off Southern California, slipped while repairing a wharf two weeks ago and a spike ripped a gaping wound in his thigh.

San Miguel is without a doctor, a boat, or any means of communication with the mainland. No ship was due for weeks.

Realizing that Brooks would bleed to death unless the wound was closed, Hastings Lever, only man on the island set to work with a knife, shell-shocked World War veteran, lives on San Miguel with his wife and two children, and works for Brooks.

He boiled a fishline and the needle he used to repair fish nets. While the injured man dug his nails into the hunk and gritted his teeth, Lever sewed up the wound without anaesthetic. He prayed while he sewed.

For twelve days no passing craft heeded their distress signal—the American flag flying upside down. Santa Barbara arrived four days ahead of time with supplies. It rushed Brooks ashore.

Physicians at Cottage Hospital said the amateur surgeon was so thorough that no infection developed.

Selling Canada's Wheat

Publicity Campaign In Britain Planned With Care

The Canadian Wheat Board sends us a brochure containing hand-silently printed reproductions of the material used in its United Kingdom advertising campaign.

The board says that so far as it knows this was the first attempt which has been made by any wheat-exporting country to promote the sale of its wheat by advertising and publicity.

The campaign was planned with great care. Advertisements designed for their respective fields were used in the newspapers of England, Scotland, Northern Ireland, emphasizing the advantages of Canadian hard wheat in the making of bread. At the same time a series of advertisements in trade journals was addressed to millers, bakers and retailers.

The Canadian Wheat Board is dealing with a product of unequalled quality, trying to increase its sale in the rich and concentrated market of the United Kingdom, and its campaign appears equal to the occasion. Ottawa Journal.

Was Infraction Of Law

Man Found His Neighbor Act Cost Him Plenty

It cost George Thiesen of Merrion, Sask., just \$25 to be a good neighbor. He undertook to transport the band from this town, 28 miles northwest of Saskatoon, a few miles to a picnic spot in the woods near the town, a good turn he met up with the law.

He was fined in Royal Canadian Mounted Police court for infraction of the vehicle act by carrying passengers in a truck.

A motorist driving 45 miles an hour steadily for 10 hours a day would require 15 years, 10 months, and 21 days to travel over all the improved roads of the United States.

From here it is beginning to appear that trying to get rid of relief is much like trying to throw away a wad of chewing gum, says Judge.

Hamburg, Germany, has a population of more than 1,128,000.

Festival Date Changed

Set Back One Month When Delegates Met At Moose Jaw

Dates for the 1938 provincial music festival were set back a month as delegates from five provinces concluded the 12th annual conference of the Western Canada Music Festival Association at Moose Jaw. Next year the Saskatchewan festival at Saskatoon and Regina will take place the latter part of April, from April 25-30.

At present no definite arrangements have been made for the 1939 festival, but it is believed that either Regina or Saskatoon will conduct its festival first. So far, the final arrangement will be followed whereby in 1938 Regina will be first, Saskatoon second.

In 1937, the festivals took place during the last week in May. Delegates were from Saskatchewan, Manitoba, Alberta, British Columbia and Quebec.

Represented for the first time at the conference was the Quebec Musical Competition festival which held its first festival this year in Montreal.

The organization was represented by Dr. W. Willis Monteith, adjudicator.

Adjudicators in 1938 will be Sir Hugh Robertson, Glasgow, Scotland, who will adjudicate choral and vocal competitions; Maurice Jacobson, London, instrumental and choral adjudicator, and Stewart Wilson, London, who will also adjudicate vocal competitions.

Adjudicators in 1939 will be Sir Hugh Robertson, Glasgow, Scotland, who will adjudicate choral and vocal competitions; Maurice Jacobson, London, instrumental and choral adjudicator, and Stewart Wilson, London, who will also adjudicate vocal competitions.

The board says that so far as it knows this was the first attempt which has been made by any wheat-exporting country to promote the sale of its wheat by advertising and publicity.

The campaign was planned with great care. Advertisements designed for their respective fields were used in the newspapers of England, Scotland, Northern Ireland, emphasizing the advantages of Canadian hard wheat in the making of bread. At the same time a series of advertisements in trade journals was addressed to millers, bakers and retailers.

The Canadian Wheat Board is dealing with a product of unequalled quality, trying to increase its sale in the rich and concentrated market of the United Kingdom, and its campaign appears equal to the occasion. Ottawa Journal.

Was Infraction Of Law

Man Found His Neighbor Act Cost Him Plenty

Hamburg, Germany, has a population of more than 1,128,000.

Had Successful Year

Canada's Fishing Industry Showed Big Increase In 1936

Canada's fisheries in 1936 experienced the most successful year since 1930, the Dominion reported.

Value of production in 1936 was \$39,164,000, the total representing the value of fish as marketed, whether sold for consumption fresh, or as canned, smoked, dried and other forms.

It showed an increase over 1932, low year of the depression period, of \$13,297,569 or 51 per cent.

Quantitative of fish taken by Canadian fishermen during 1936 was 11,083,270 cwt., with a value of the point of landing of \$22,835,712, compared with a catch of 9,532,016 cwt. and a value of \$20,755,787 in 1935.

Argentina, Canada, China, Great Britain, India, the Netherlands, and the United States are the most important markets for German watches and clocks.

Berlin is now the third largest city in the world, next to New York and London.

The yearly average of forest fires in the United States is 4,700.

Easy To Identify

When the police of Hermanns, South Africa, inspected the trail of a burglar, who had stolen \$100, the Sherlock Holmes instinct told them that the thief must be one. One of the big toes was peculiarly formed. All the well-known jail characters passed inspection, and the trail finally led to N. Cupido, an amateur burglar, who was sentenced to four months hard labor.

Midnight has an intensity about one-fourth of a foot candle; bright sunlight at noon has an intensity of about 10,000 foot candles.

Left Legacy For Poor

But Town In Scotland Has No People Who Qualify

There is a small town in Aberdeenshire, Scotland, called Turriff, with a population of over 2,000, who are a very proud people. That is not to say that they are conceited, or affect a lofty attitude toward other communities.

The colloquial name for it is "Turriff" and the locals have a slogan: "Ewwa Turra Turra" twal miles around, twal miles around, what are ye?" If you don't know what that means, interpret it.

"Take away Turriff and twelve miles around and what is left of the universe that is worth while?" That's the sort of people they are in "Turriff." They regard their town as environs and the people within as the hub of humanity.

Turriff has really justification to boast though. Recently a native of the town died in New Zealand and made a bequest of \$25,000 for the poor of Turriff. That is where the Town Council is in a pickle. There are no poor in Turriff and the administration cannot carry out the terms of the gift because there is nobody to give the money to.

Finding some solution, or the improbability that some of the local folks will go broke, the \$25,000 has been handed over to the custody of the County Council.

A place of that kind surely lives up to the distinction which it confers upon itself—St. Thomas Times-Journal.

A Modern Pastime

Many People Before Public Eye Receive Fan Mail

A writer in the Manchester Guardian considers a trend of to-day that is new and astonishing in vastness—"fan mail."

Thousands and thousands of these letters are posted every day. It begins with actors and actresses, singers and other public entertainers who have for years received letters from their admirers, but as soon as the cinema became the chief medium of entertainment girls and boys, and principally girls began to write to the film stars and fan mail really began. Now it is not confined to film stars, but extends to prime ministers, as we heard from Stanley Baldwin. It extends to everyone who comes before the public eye, even to wrong-doers.

"There is, however, that any one speaks of his pastimes. It is a private matter between himself and the adored one for most of the letters are tributes of admiration."

Accurate Information

Milwaukee Has Plan To Determine What Visitors Spend

H. B. Cowan, Jr., manager of the Examiner's circulation department is just back from attending a convention at Milwaukee and reports an interesting plan by which the Milwaukee Association of Commerce gets accurate information as to the extent of the expenditures made by visitors to the city. The idea is to ask visitors to fill out a short card which he is asked to fill out showing where he stayed, what stores he visited, what chases were made at and how much he spent on shelter, amusement and other things, the information to be regarded as strictly confidential.—Peterborough Examiner.

Argentina, Canada, China, Great Britain, India, the Netherlands, and the United States are the most important markets for German watches and clocks.

Berlin is now the third largest city in the world, next to New York and London.

The yearly average of forest fires in the United States is 4,700.

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SALTER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER VIII.—Continued

"Cross your heart, Paddy, are there fairies?" the child said to me. "I'll not be denying them." I told her, "or the little people might let me fall down and hurt myself."

"Why, Betty," I went on earnestly, "the world wouldn't get along at all without the fairies. It's the fairies that keep the little birds and bees from getting lost. It's a fairy that teaches a little calf to bunt and wag its tail in order to get the milk. Come down with me," said I, "and I'll show you the fairies at their work."

As we entered the stable door, the swallows were skimming in and out from their clay nest stuck on the ceiling.

"Just look at that!" said I. "It's Irish faeries that taught the birds to build their neat clay cabins up where everything is safe and dry."

"Oh, Betty," questioned, "but the swallows always did that?"

"Oh no!" I told her, "they couldn't do that till the Irish came into the country and built the stables for them. And, of course," I proceeded, "the fairies we brought with us from Ireland knew all about mud cabins and such like . . ."

The old sow, Sally, had farrowed that morning, and I had just left her sprawled contentedly on her flank with a mass of squirming black sucklings pulling at her bugs.

"Just look, Betty, at the faeries teaching the little pigs how to get their bellies full of milk," I told the child.

"Oh! Dad, how many are there?" she exclaimed, as she hoisted herself on the side of the pen.

"Twelve," said I, "and a rust. And each one knows off-hand his own proper drinking place, and watch him fight for it. Now that," said I, "must be the work of the faeries."

"Why, Betty," said I, "you wouldn't be denying your own little faery? She comes to you when you are all alone, and tells you you are bad little girl, and makes you feel sorry."

"Well, Betty confided to me, "I never right heard her talking, Paddy, but I do feel her whispering to me . . . ee."

"There you are," said I, "your own tiny pig may be too small to be seen, but she's round with you all the time, is your little Colleen Rue. Just leave old Sarah Duncan to mind babies. I told her, 'and come to Paddy Slater for reliable information about the little people.'"

Time flew by like a bird on the wing. In the spring of 1850, Bob New Pitsigo came to the Marshall farm, and he rode the stele away from the heart of young Charlie Marshall. Two seemed contented with them—but three a crowd. Bob was a black colt with tan markings, and the white collar on his neck stood out like the ruff on Queen Elizabeth. In the old history book, He was a colt pup of high degree, with but one year to his credit; but, as for seeing the world, the young dog could do some stout boasting. The best blood of Scotland, ye ken, flowed in his veins. James Duffus had brought the young dog out with him that spring from New Pitsigo, in Ayrshire; but the Scotsman tired quickly of farm conditions in the colony, and, on returning to Scotland that fall, Duffus had given

the dog and the boy to one another because of the warm attachment that had grown up between them. It was a fast friendship that lasted till death parted them. The two were chums who knew no quarrelling; there was never anything between them to forgive or forget. Of course, the normal lifetime of a dog is but a brief space. He reaches maturity at eighteen months; at which time he has got his learning and his habits are formed; and the infirmities of old age creep upon him after the tenth year.

I say little as to what has come of the Aberdeenches; because I find the Highland Scots well able to blow their own horn. You have more beef and are more nutritious than the cheap things we grow hereabouts. Yet it is a thing out of the ordinary, I'll admit, that the best beef cattle in the world, the Shorthorn and the Angus, were bred up to perfection in a rough shire that can also boast good dogs and many bonnie women. "Facts are shields that winna ding and durst be disputed."

The Scotch colts was the dog of the Highland shepherd; and a pure, honest celt was he. For centuries, his forebears held a gentle dominion over the timid, black-faced sheep in the North. Life in the open, during the nights of a thousand years beside the plaid, gave him a silent understanding of the world. On hearing of him, he knew one master only; and the very life of the dog hung on; in an acceptable way the great, inscrutable, hairy-legged creature who was helpless and forlorn without him. Even on the Lord's Day, the Scotch collie took his shepherd to church; and he had the decency to put off private affairs and dog fighting until the psalms were sung and the benediction said. Centuries of such intimate, personal, working contact with dour shepherds, in a great quiet world of rocks and winds, subjected the young of the colts to a slow, slow process of selection under the pressure of the weather and the waywardness of the hosts. They did not live long enough to reproduce their kind. If a collie bitch let her love fancy wander to another type, it was a pitiful world that faced her mongrel brood.

And the body of the Scotch collie, and his mind, also, were the result of centuries of training. In eastern lands, the sheep follow the shepherd's rod and staff; on the Scottish Highlands, great flocks roamed leisurely over rough, broken pastures; and it was the lonely shepherd's dog who guarded them as they lay in green pastures, and led them beside the still waters.

Bob's body was built to answer the call of such a life. His bones were small and erect, save at the tips. With body long and thin flanked, and legs strong and muscular, the shepherd's dog was fleet on his way, and swift as a flash of light. His small, keen, sharp eyes, set slightly oblique on a long pointed skull, followed his master's signals from afar.

One would have to renew within himself the heart of his childhood to realize the thrill it gave Charlie Marshall, a quiet-spoken, barefoot boy of ten, to have as his first, and as his special and very own possession, a big, fun-loving, brown-eyed dog like Bob. There was a riot in their play; and a noisy climax to the tricks they had over the sheep. When the pair pretended to be on a horse or busby about affairs of his own, Charlie would make speedy tracks to the barn; and shinnying up the ladder, slip through an opening in the loft and down a rope to find a hiding place behind some stump or boulder. Off Bob would then dart, his face beaming with excitement, to work out the problem of the broken trawl, and with a joyous bound to spring upon the fugitive, pulling at the boy's pants and poking a long, wet snout into his legs. A trawl broken by wading up the creek was a smart trick; but Bob solved it. It strikes me that when a dog once learns he never forgets.

Charlie and his dog proved a useful pair about the Marshall farm. It had been the boy's job to bring the milk cows home; and, in some seasons, that had been quite a task for the little lad; because the cows wandered far to find green pickings in sheltered, hidden places. But Bob now went with him, which made it a simple and pleasant matter.

One Saturday afternoon, Charlie slipped off a beam in the barn, and the old dog was badly sprained in the fall. "Presto," he decided on the cow-bringing job, but had to leave things in a lurch like that, the dog quickly went back to the bush and brought the cows up on his own account. I do not, of course, ask you to infer that the dog was doing any thinking; he may have been an automaton guided by some blind instinct. But an interesting point is that the dog quickly got back to the bush and brought the cows up on his own account.

A Vienna barber won a contest by shaving a man in 18 seconds. The customer should get a medal for bravery.

Not Bob just brought up the cows that required milking. And after that the colts made a practice of going for the cows himself; and night and morning, and right on the clock, the string of sedate matrons would slowly into the stable yard. And the dog made it a friendly, leisurely business. As you know, a milk cow's nerves should be calm and restful at the milking time, because she actually makes the milk while one expresses it from her. Unless she is in mild, patient and benevolent humor, her milk glands become tense with their secretions. Bob awoke to find that there was no dogging of the Marshall cows.

One morning, Bob brought up an excited roo heifer to the milking yard.

Marshall smiled.

"So, Bobbie, you think Plessie'll be needing the milking too. If you'll help me, we'll just slip her into the stable, and after she gets a bit more impatient, well follow her down, and you'll see."

It was a highly excited heifer that was let out, after what seemed a long wait, to paw bawling down the lane toward the bush where her treasure lay hidden. The roo became apparently to Marshall that the young mother had no notion of leaving the two brutes to the hiding place of her precious, little, saucer-eyed calf. She was on to their tricks; and time was not the essence so far as she was concerned. Nor let that wicked man run his legs off chasing a loving mother over fallen trees in accessible gullies!

And a pale-faced human makes a poor first of finding anything in unbroken timber lands. He has only his ears and eyes to guide his quest. And a young cow, who has gone wild at calving time, hides a calf that crouches mute and still as a granite boulder until hands actually laid on its body prove that the game is up.

(To Be Continued)

Gathering The Ship-News

Not As Exciting As It Was Before
Dad Was Used

One day in a recent week, thirty-nine passenger-ships were announced to arrive in New York's harbor.

From the Barge Office, two cutters were readied to take the press-writers and photographers down seven miles of hay to meet the pretty girls and famous personalities on the more important incoming liners.

The Ship-News Reporters' Association office in the Barge Building at the Battery became a riot of jangling telephones from newspaper city editors who wanted to know where the ships, incoming celebrities and their reporters might be in all the confusion.

Heading the delegation was T. Walter ("Skipper") Williams, of the New York Times, dean of Gotham's water-front corps of reporters. A native of England, now in his sixties, "Skipper" has finished his 32nd year of active service. He says he's seen them all come and go, but that covering ships isn't what it used to be.

"The personal touch is gone," he laments.

Once upon a time, tugboats would put out from the New Jersey coast, and would approach incoming vessels and haul disengaged boats down. Then, in turn, would telegraph from the Jersey coast.

"But with the radio, news cables—the news is old before we even get to it," Williams said. "The real news—ship-news reporting went out when Marconi came in."

The "Skipper" plunged into work as soon as he returned from (his 10th crossing) the Coronation and the opening of the Exposition in Paris. Emphatically he denied the statement that he disapproved of Miss Dixie Tighe of the New York Post, first and only woman ever to cover ships in New York. He says he is merely fearful that women will get hurt clambering up the sides of ships.

Determine Age Of Fish

Growth Of Rings On Scales Give Scientists Clue

Microscopic annuli, or growth rings, on the scales of striped bass are providing science with new data explaining for the first time the mysterious movements of fish that have puzzled fishermen for generations.

Daniel Merriman, graduate student in zoology at Yale University, is completing an extensive study of the growth rings on bass at the mouth of the Nanticoke river in Connecticut, and has found that the rings correspond to the growth rings of trees. Studies under a microscope, the author reveals the age of the fish, the rate of growth and whether it goes south in winter.

A Vienna barber won a contest by shaving a man in 18 seconds. The customer should get a medal for bravery.

BABY'S OWN SOAP

Best-For-You

...Baby Lo

Was Once A Hospital

St. James's Palace Has Special Place

Among Royal Estates

As the scene of several marriages and christenings within the Royal family, St. James's Palace has a history of its own, and the royal estates of King George and Queen Elizabeth.

Originally the palace was a hospital for fourteen maidens that were leprosy until that acquisitive monarch, Henry VIII, converted the building into a hunting lodge. From to-day presents the most favorable aspect of the approach to the Palace.

Most of the children of the ill-fated Charles I. were born at St. James's, and it was from there that he walked across the park to his execution in Whitehall. William IV. was the last monarch to make this hitherto his principal residence.

The present King's father, and mother, George V. and Queen Mary, were married in the Chapel Royal of St. James's which still preserves the ceiling attributed to Holbein, a masterpiece of art. George and Mary were married in this chapel in 1893.

Queen Victoria was married there in 1840, and the future German Emperor and Empress Frederick.

Few of the historic buildings of the Empire's capital greet the eye with more charming effect than does St. James's Palace. With its octagonal towers of mellow brick, its mulioned windows and quaint carvings it takes the beholder into the times of Tudor.

Although St. James's has long ceased to be a residence for the sovereign, the Royal levees are still held in it, and within its quiet precincts reside several members of the Royal family. Many Canadians will recall waiting upon the former Prince of Wales, who for many years had his quarters at York House, St. James's.

The State apartments in recent years have not only been used for ceremonial occasions such as levees, but have also accommodated the meetings of Indian delegations like the India Conference. From the windows of the old presence chamber the new sovereign is still proclaimed on his accession. The magnificent fire-place bears the initials of Henry VIII. and Anne Boleyn.

Mysteries Of Ocean Currents

Buoy Drifts From Arctic Ocean To

The Bay Of Biscay

A buoy cast into the Laptev Sea (in the Arctic) by the ice-breaker Shiryakoff during her voyage from Archangel to the Pacific in 1932 has been picked up in the Bay of Biscay, near the French coast, and sent to the All-Union Arctic Institute at Leningrad. It is known that the buoy had traveled more than 7,600 miles, and Professor V. Y. Wise is of the opinion that it drifted from the Laptev Sea to the Polar basin north of Franz Josef Land, then down the East Greenland current to the southernmost promontory of Greenland before reaching the Bay of Biscay.—London Times.

Canadians Eat More Pork

Has Now Supplemented Beef As The

Favorite Meat

Pork is the favorite meat on the Canadian menu. Figures published by the Dominion bureau of statistics on meat and dairy products consumption during 1938 show pork has supplanted beef.

Beef and veal consumption fell from 750,870,000 pounds in 1935 to 692,900,000 in 1938 while pork jumped to 748,000,000 pounds from 678,000.

More chickens went into pot and roasting pan, but demand for turkeys, geese and ducks fell off.

Butter consumption has increased steadily in the past four years.

Natives of Tristan da Cunha, a tiny island of the South Atlantic, have never owned tooth brushes, but 84 per cent. of them have perfect teeth.

"When the Battle of Trafalgar was fought the papers did not give much space to the first reports," says a historian. But Lord Nelson got a signal victory.

London spends \$40,000,000 a year on its police force.

Youth Of Canada

Former McGill University Principal Has Words Of Praise

According to Professor A. E. Morgan, former principal of McGill University, Montreal, modern university youth of Canada constitute "one of the very striking assets of Canada."

"In the universities one sees the best examples of those who are going to be the leaders of Canada tomorrow," said Prof. Morgan, who has just returned to Great Britain. He declined to make any comment upon his resignation as principal of McGill. He said he had no definite plans for the future beyond taking a holiday.

"If one dared to generalize, one would say that the youth of Canada is less sophisticated and more optimistic than the youth of Great Britain," said Prof. Morgan.

"This does not mean that conditions have been easy for him. Environmentally, they have not, and the unemployment of youth has been very serious. But their spirits do not seem to have been dampened and one fails to find evidence of cynicism."

Discussing Quebec province, the ex-principal of McGill said "the province is in a position to be the most reactionary part of Canada. At the same time, it is a stronghold of the older cultures, both French and English. In that respect it makes a great contribution to the Dominion as a whole both as a leavening and a steady influence."

Started Him On Career

Unpleasant Experience Set Newspaper Man's Foot On Writing Trail

Frank Clifford Smith, 72, whose literary career began when a bunch of thirsty Indians dumped him unmercifully atop a stove, is dead.

He had been on the Montreal Star's staff for 40 years, and many a time in that period he had set young reporters to chuckling over his recital of how he became a writing man. It happened on the western prairie, when he was in charge of an isolated post office.

Indians were about his only companions at the lonely post. One night, he passed around a bottle of "firewater." The redskins soon drank it, and asked for more. None forthcoming, they sat at their host on the office stove and threatened to light the fire unless he found some.

Persuasive argument got him out of the predicament, though, and soon after he capitalized on the incident to win a \$50 prize offered by a London photo studio for a personal adventure story contest. That night his foot on the writing trail, he wrote plays, novels and short stories for then on, besides his newspaper work.

He was a native of Kent, England.

A very thin man met a very fat man in the hotel corridor. "From the look of you," said the latter, "there might have been a famine."

"Yes," was the reply, "and from the look of you, you might have caused it."

The average human body loses weight at the rate of one pound every eight hours by evaporation of moisture through the lungs and the pores, and through exercise.

The World War added 6,000 new words to the English language.

Wheat has been planted on 32,167,000 acres in India this year, and good crop is expected.

FORMER ATHLETE ALMOST A CRIPPLE

Now "Right As Rain" After Taking Kruschen

Read a letter from an athlete telling how he obtained relief from rheumatic pains.

"My knees were so stiff with a kind of rheumatism from wear and tear on my hair that I could not stand up without pain and difficulty. This had been growing worse and worse for about two years. It was all the more galling because I am a young fellow and had played for two seasons at football and held my college record for the 100 and 220 yards. Naturally I tried all sorts of remedies, but with absolutely no success. Then I decided to try Kruschen Salts, and to eat a long story short, I am now as tight as a drum."—W.S.T.

The pains and stiffness of rheumatism are frequently due to deposits of uric acid in the muscles and joints. Kruschen helps to stimulate the excretory organs to healthy regular activity, and so enables them to eliminate this excess acid from the system.

Little Helps For This Week

One thing have I desired of the Lord, that will I seek after, that I may dwell in the house of the Lord forever, to behold the beauty of the Lord and to inquire in His temple. Psalm 27.

Thou art the Temple, and though

I am lame, Lam from my birth, and shall be till I die, I pass through the Gate called

Beautiful, And am alone with Thee, O Thou

Most High.

Consider that all which appears beautiful outwardly is solely derived from the invisible spirit which is the source of that outward beauty. These are streams from the uncreated Fountain of all good. Our hearts should rejoice at the thought of that eternal infinite Beauty which is the source and origin of all created beauty.

Not Particularly Helpful

Man Received No Assistance From Secretary Of Client

Arriving in New York on a business trip a gentleman was invited to dine at the house of one of his clients. He forgot to ask how formal the meal was to be, so when he went back to his hotel to dress he called a clipper office, and finally got through to dinner at Mr. J.—a lame man. He said, "I want to know whether to wear a white or a black tie." "That all depends," she said brightly, "on whether you are going to wear tails or a dinner jacket."—The New Yorker.

Railway Electrification In Sweden

Completion of electrification of 602 kilometers of railway lines in Sweden this year will bring the total electrified mileage to 3,849 kilometers, 35 per cent. of all lines belonging to the state railways, carrying 70 per cent. of the traffic.

Wheat has been planted on 32,167,000 acres in India this year, and good crop is expected.

HOW ABOUT PRINTING

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to your self and your local paper to back up these efforts by at least having your printed matter done locally.

The Gleichen Call

Thirty Years Serving Gleichen and Community

Town & District

Mr. and Mrs. Aut Wilson and family of Lethbridge spent the weekend in town visiting Aut's relatives and renewing acquaintances with old friends.

The duck shooting season opens at noon next Wednesday Septem' 15th. Already the sports have been looking over the sloughs through the district and have about settled where they will waste much ammunition. Wednesday being a half holiday there will likely be a much larger number of hunters in the field than usual.

Labor Day was observed in Gleichen as a holiday consequently almost every place was closed and the streets were deserted. A number attended the junior baseball game at Arrowwood.

Miss Jean Farquharson has resumed her piano classes for 1937-38. The following are the results of her pupils who took the examination held by the Toronto Conservatory of Music for 1936-37: Theory: Robert Black, first class honors having obtained the highest marks in the Calgary centre (a perfect paper.) Jean Black, first class honors. Practical: Grade V: Jean Black honours. Robert Black pass. Grade IV: Eileen Collins, honors.

When Aunt Jane was dying she called Mary to her side. "I want ye to take the back width out of ma' burryin' dress," said she to her 'versel,' she said "I'll make it fit gran' cloak." "Oh, but Aunt," protested Mary, "I couldn't do that. Why, when I walk up the stairs of Heaven wif' Uncle John a' the folks will stare at ye." "No they won't, they will be looking at yer Uncle John, I buried him without his kilt."

Are we going to be a race of stoop shouldered men? One would naturally thing so to look over almost and large crowd, walk down any crowded street, or glance at the average male human being you meet. The man who walks with his head erect, his shoulders thrown back and his chest extended, just as nature intended he should, it is a rarity and is remarked about wherever he goes. The average man, and more's the pity, the average young man, walks as if he were very tired.

There are some people who are very careless about throwing old truck into the lanes. Such people should be taught a little civic pride by a modest fine. It is impossible for the authorities to keep places clean if people will persist in such practices.

It is not the size of a town, but its character and beauty that makes it a desirable place to live in, and a town may prosper and be small. All should be interested in its prosperity. One of the best ways to help a town is to speak well of it. It is true patriotism to stand by your town, and interests that effect the town should effect every citizen.

Honesty is the best policeman of your life. It keeps other would-be traffic violators in check and in line.

ST. ANDREW'S CHURCH

The Rev. Geo. Lang, B.A., Incumbent of Strathmore and Gleichen, will hold Harvest Thanksgiving services in St. Andrew's Church on Sunday September 19th at 11 a.m. Watch for further announcement.

EVERYONE PROFITS

About the first thing a tourist does when he gets out of his car is to hunt up a place to eat. The restaurant keeper gets the tourists' money, but he has to buy the food he sells them. Because of the tourist business Canada exports about 15,000,000 pounds of butter, 30,000,000 pounds of meat, five million dozen eggs besides all the other things the tourists eat. The farmer gets that.

Where there is a large number of tourists in a district, prices of farm produce are raised at a time when there is the greatest production. New cabins must be built; repairs and improvements made to meet the demand of tourist accommodation. These people just have chairs to sit on, beds to sleep on, all of which brings work for someone. There must be boats for hire. Owners of streams where fish are to be caught obtain their rod charge.

Even if the store keeper did not sell a dollar worth of goods to the tourist, he sells more to the farmer, the carpenter, and all those catering to tourist happiness.

In fact everyone gets his share. You can't tell how far it goes.—Exchange.
